Right after buying you will be able to add Explorer Context Menus support to all your programs, it never was easier.

Testimonials

"At April MSDN magazine issue we read, that Windows Explorer Context Menu &ndash; is the best method of appending custom menu items to Windows Explorer context menu. Because it was needed in my work, I advised procurement department to buy site license of it for our company and explained why. Now I and my colleagues use Windows Explorer Context Menu in our development. What I can say about Windows Explorer Context Menu? Easy to use it in development, it always works, even on all new operating systems, so with it I have no compatibility issues. Useful component, that saves time and money."

Kevin Allen, .Net developer from Modular Computing Systems, Inc., Dallas, kevin.allen@modularcomputing.com

"Our company develop and sell wide range of hardware solutions and software for them. For many of our software

products, such as hardware-based video processing systems, we need to add custom items to Windows Explorer context menu. We tried to add items to shell context menu using our own, unmanaged C++ code, but result was unacceptable - it didn't work on some computers, had problems on 64-bit operating systems, and on Windows Vista our menu items for some reason didn't show at all. I even supposed to hire a separate full-time employee for developing and supporting of context-menu systems for our software. One of our engineers advised to use Windows Explorer Context Menu. Already over a hour all our menu items were appended to Windows Explorer context menu. And I was not surprised, that it is much better than all that we had done: Windows Explorer Context Menu Solutions, Inc. - is an organization, that is focused on developing of context menu systems and it developed Windows Explorer Context Menu for more than 5 years. It is really useful .Net component for everyone, who need to add his menu items to Windows Explorer context menu." Mark Varming, Software development coordinator from Lenovo Corporation, [markvarming@lenovo.com](mailto:markvarming@lenovo.com)
